

KARADI PATH

Karadi Path Education Company is a social innovation enterprise that creates an English environment for classrooms, rich in Indian experiences and culture, to help children learn the language through a process of discovery. The company has its genesis in Karadi Tales, India's pioneering audio-book venture for children, and an internationally acclaimed children's publishing house. In the early years of education, a good foundation in English helps students understand and master other subjects early. It also allows greater access to the huge treasure of information and knowledge available through books, internet, customized and shared audio and video tools. English proficiency paves the way for greater opportunities. Karadi Path methodology is an indigenously developed language learning process that is revolutionising the way language proficiency is achieved in schools. It is the product of over a decade's research into language acquisitions. From tribal to international schools, Karadi Path has proved that higher and faster language proficiency can be easily achieved. The Karadi Path programs of Power English and Magic English are now being adopted across many schools in India. Scholars proudly associates with it in Primary wing.
