

MBS INTERNATIONAL SCHOOL, DWARKA ACTIVITY REPORT

Date: -23-11-2021

Class : I (A,B,C,D,E)

Class : II (A,B,C,D,E)

Name of the Activity: Colour Symphony

Objectives:

- To enhance their observational and logical skills.
- To give them a platform for hands on experiment.

Everything is theoretically. impossible, until it is done.

The Eureka Club of MBS International School organized an online activity 'Colour Symphony' for the students of Grades 1 & II on Tuesday, November 23, 2021. This activity was based on the Principle of Colour Symphony. Before starting the experiment, the teacher explained the rules.

We firmly believe that children are never too young to be exposed to the scientific method and absorb the learning into their practical life. The children of Grade I & II were introduced to a unique Science based activity, involving milk, food colour and liquid dish soap. They were elated after performing the experiment since it planted the seed of reasoning and curiosity in their young minds. The children felt overjoyed as they came across interactive method to garner scientific learning. These kinds of experiments encourage the budding students to increase their inquisitiveness from an early age and build their observational and logical skills while undertaking an activity. The students not only gained knowledge but also enjoyed doing the experiment by themselves. It was very informative and knowledge enriching activity for every participants.

Science is a magic,

Experience it & experiment it.
