Event Name: Make A Clock

Event in-charge: Ms. Manpreet Kaur

Date of Event: December 21, 2021

Attended: Class I- A, B, C, D, E

Venue: Google Meet

‘Mathematics is not about numbers, equations, computations or algorithms; It is about understanding.’

Aryabhata Club celebrates Maths Week annually to foster love for maths among students. Many fun-based activities are organised for students to remove their phobia for the subject in their formative years. It helps primary school children to enjoy, appreciate and acquire basic knowledge of the subject. Mathematics is described as the Queen of Sciences and the King of Arts. To stimulate curiosity and love for the subject, MBS International School organised ‘Make A Clock’ activity for students of Grade I.

The objectives of this activity were to make students learn about placement of numerals and hands on an analog clock. They also learnt how to read time from the clock. The students made a clock with the help of a round thermocol plate. They wrote numbers on it with the help of bold marker and made hands on clock with the help of A4 sheet. They decorated the clock with their creativity.

The zeal and enthusiasm among the students were the proof of the joy and fun they experienced during the activity. Apart from reinforcing the concept among the students, the activity also helped in enhancing their creative and psychomotor skills.

Teachers appreciated and acknowledged the efforts done by students.
