Scratch story

VI

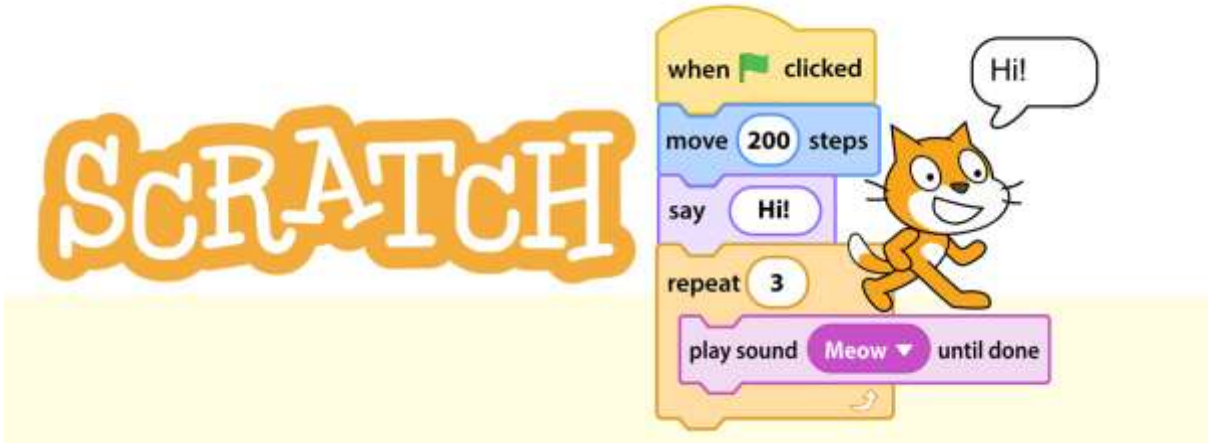
Scratch opens up an exciting world of computer programming for school students and other beginners in programming. It is a free programming language and online community where one can create one's own interactive stories, games and animations. It is a block-based visual programming language, targeted primarily at children of the age group 8-16 years, to help them learn code.

With this idea in mind, Scratch Competition was held for the students of class VI. Students participated with great zeal.

The young learners, made thought-provoking stories using Scratch, thereby learning the various tools and techniques of the programming language as well.

Parameters/ criteria to access competition

- Impact
- Aesthetics of display
- Clarity and expression
- Originality of work
- Knowledge



SCRATCH
when clicked
move 200 steps
say Hi!
repeat 3
play sound Meow until done
Hi!
