

The garden provides ample opportunity for making science inviting and relevant to student's lives by inspiring active exploration and problem solving. The garden encourages inquiry as students use their senses, reasoning, and communication skills to find answers to questions

To learn the importance of caring for natural resources, MBS International School has conducted an activity 'Making Hanging Garden' for the students of class VII on August 20, 2020 to create awareness about natural World.

The students participated actively and send some nice pictures to explore their creativity.

The activity was thoroughly enlightening and productive. Students of class VII enthusiastically and actively participated in the activity conducted and showed their creativeness and radical thinking
