Handwriting is an essential skill for children. Handwriting activates the brain more than keyboard because it involves more complex motor and cognitive skills. MBS International school took an initiative and conducted an activity ‘ Likhe Sunder Dikhe Sunder’ for the students of grade 1.

Handwriting contributes to reading fluency because it activates visual perception of letters. The students made the most of this opportunity by actively participating in the activity. This activity enabled our students to ignite their imagination and helped them to intensify their writing skills. Ms Savita Chillar Primary Coordinator supervised the activity and appreciated the students for their efforts and encouraged them. Best three students were selected from each section.
