is surviving
now only by
depleting the
planet's natural
resources and
poisoning its
environment**

intelligent and adaptable species. But overpopulation has reduced civic amenities. This means humans will only be able to make technological advancements for a limited period.

**Navomi, JM INTERNATIONAL
SCHOOL**

SCHOOL

3 In the present scenario, it can be said that the human race might extinct soon. Overpopulation, ecological collapse, global warming, nuclear warfare and pandemics technological advancement in fields such as artificial intelligence, or biotechnology – are scenarios of human extinction. Humans are an extremely
