## SCHOOL IS COOL

Equipped to cope with emergencies

**W**ith a view to equip the children with the knowledge, proper attitude and skills on disaster management, JM International School, Dwarka conducted an earthquake drill for all the classes. Students were briefed that earthquake drills and exercises constitute an extremely important part of the preparedness plan because they help people respond better to the consequences of an actual earthquake and evaluate how well all parts of the emergency

plan work together. The building was evacuated in less than two minutes. All grade levels occupied the designated area allotted for them based on the school evacuation plan.

**D**AV Public School, Sec-14, Gurgaon organised a mock earthquake evacuation drill under School Disaster Management Programme. The entire mass of students and staff with class-IV employees evacuated the school

building. School principal Aparna Erry supervised the preparations and ensured that even students with medical ailment were evacuated with utmost care. Two fire safety drills were also conducted with the help of fire-fighting experts where the staff members were trained about the right way of using fire extinguishers. The objective was to empower students with the skills required to face any type of emergency without panic or chaos.
