

GRADE IX-XII
APRIL'21-JULY'21

XAVRONICLE

The Xaverian Vibes!!

Director-Principal

Meaningful learning takes place not just in the classroom or on the field but also through this journal.

I feel exceptionally privileged and joyful to join as the Director-Principal of St. Xavier's High School, Sector 49. My earnest efforts will be to provide our students with a challenging, comprehensive and balanced education, so that each pupil will make a contribution in some field and be recognized for it.

I use this platform to convey to all my pupils that each one of them is extraordinary in their own way and reiterate that they are the life of our school and the very reason why the school exists.

Deserving of special commendation is our editorial team for the distinguished efforts put in to design and compile this journal. The meaningful articles by the pupils are laudable. My gratitude to the teachers in-charge for their well-thought-of mentorship. Well done all of you! In the times to come we will take this to greater heights.

It is my pleasure to invite everyone to explore these pages, discovering more about the activities and achievements of our wonderful school.

John Rafi

Director-Principal

Senior Coordinator

"Success is not final; failure is not fatal: It is the courage to continue that counts!"

Warm Greetings to One and All!

I am delighted to present the first edition of the Quarterly Magazine of Senior Wing, "XAVRONICLE". I would like to appreciate the efforts of all staff members and students for their contributions in the form of art works and expressions in this E Magazine.

Warm Regards,

Dr. Rajni Hoda

Senior Coordinator

The Future Begins Here & Now!

"Your future is created by what you do today, not tomorrow."

Future planning and time management are the key ingredients of success. A guided path and hardwork are a must. Guiding students on the quest of excellence to a class worth learning, St. Xavier's High School conducted a session

"THE FUTURE BEGINS HERE AND NOW!"

Host, Grade X enlightened Grade IX with upcoming opportunities for students, quick internships and utilisation of time. They focussed on the importance of academics as well as extra-curricular activities.

The session also consisted of quick tips for time management in particular-creating schedules and following a self study plan. This will surely assist in gaining control over the most powerful warrior - TIME.

It will not only help students today, but also in the future as successful and thoughtful individuals.

Some of the highly demanded skills namely creativity, emotional intelligence, analytical thinking, embracing change, leadership, active learning and growth in mindset were also brought up which highlighted the significance of mankind over machines.

As it is rightly said, "The best way to predict our future is to create it", the students were told about the importance of the present day, daily assignments and other works which count. These small day-to-day activities build up a profound mind. The students, were illuminated with some simple yet interesting profile building tasks.

Over 100 students attended the session and benefited from it.

📅 16th April 2021
🕒 12:40pm to 1:40pm
📍 MS Teams
HOSTS:- GRADE X

Literary Week

"Give every man thy ear, but few thy voice!"

"If we are true to ourselves, we cannot be false to anyone!"

- William Shakespeare

In the honor of the world's greatest dramatist and English playwright, the 457th birth anniversary of William Shakespeare was celebrated by the students of Grades IX, X & XII of St. Xavier's High School from 19th April to 23rd April 2021.

While the students of grade IX enthusiastically participated in the Declamation Competition, using the attire and props of their favourite literary character, Grade X made collages based on many works associated with their favourite writers.

Grade XII students delivered dialogues from various famous plays of Shakespeare. Through these events and interactions, all the students gained insight into the richness of Shakespeare's literary works.

The Radiance Of Reiki

"The only journey....is the one within."

- Rainer Maria Rilke

Mental wellness is the key to an efficient mind and body.

Various advantages of Reiki were highlighted, like it Dissipates Anger, Soothes Worry and Evokes Gratitude. She also illuminated the viewers with one of the best-selling books - IKIGAI and its concept referring to giving a direction or purpose to life, providing a sense of fulfillment towards which a person should move which ultimately, leads to self-satisfaction.

The Student Moderators -DAKSH MITTAL, XII B and AISHWARYA SHARMA, XII A, also supported Ms. Shruti's opinion on this and asked various questions to the guest as representatives of all the viewers, which helped to gain mental well-being during this pandemic and consequent lockdown.

SECTOR-49, GURUGRAM | 91-9910238318/19 | www.stxaviershigschoolgurugram.com

St. Xavier's High School conducted a webinar LIVE on School Facebook Page on "THE RADIANCE OF REIKI" with The Guest Speaker -MS. SHRUTI GUPTA, who is a Reiki Master and Soft Skills Trainer.

She emphasized the importance of inner happiness as well as self-satisfaction. The importance of mental wellness was the basic theme.

Yoga: A Connect of Body to Soul

Yoga is the journey of the self, to the self, through the self" – The Bhagavad Gita

Yoga is an ancient art of a hale and hearty life; the roots of which were from India and later were globalized. Yoga, unlike exercise, focuses on calming the body muscles and enriching the mind with tranquility, which acts as a mode of connection between the body and soul. As a matter of fact, to increase awareness about this connect of human life with yoga, St. Xavier's High School organized a webinar on 8th of May 2021.

The webinar was adorned by the Guest Speaker, Ms. Pooja Gandhi, who specializes in Ashtanga Yoga and is a certified Ante-Natal Yoga Trainer.

Ms. Pooja, very interestingly, inspired the moderators, Aishwarya Sharma, XII A and Chetan Sarup Mishra, X B as well as viewers by talking about her successful journey and enlightened all the attendees about the reason yoga should be practiced. She carefully structured her broad knowledge and specified the advantages of yoga and the preferable time it should be done. She concluded the LIVE WEBINAR by talking about making a routine for a healthy lifestyle and to stick to home-remedies for mild ailments, instead of consuming medicines. The entire session was enlightening.

f LIVE

Time: 11 am
Day & Date: Saturday, 15.05.2021

Ms. Dutta gave examples such as how people tend to be open about visiting a physician on facing physical ailments however, rarely talk about mental health issues, much less talking about paying a visit to a psychiatrist. She also talked about the significance of normalising mental health issues because of common notions of being labelled as a "crazy person" being associated with it.

Furthermore, Ms. Dutta even took out time to talk about her phase of rejecting her mental health issues and how Role Therapy played an important part in helping her get through it. Additionally, she explained how self love is different from pampering oneself. She even created a check list to make herself more clear. She talked about how social media affects mental health and the importance of "Social Media Detox". To conclude her brief address, she recommended mapping, organising and making notes about the problems one faces. The session helped many students to get answers to their queries and concerns.

By - Payoja Banerjee
XI-C

The informative webinar was addressed by Ms. Jayasmita Dutta who is a trainer and mental health advocate. She very beautifully and modestly talked about her experience.

Tales For Teens

The word 'Storytelling,' makes people think of small story books filled with pictures meant for children.

She broke common myths, by sharing a story that was not only gripping but also had a moral whilst keeping adolescents engaged. The webinar touched on important questions such as the ease of storytelling over reading a book. Ms. Shefali's radiant personality left all the attendees and moderators of this webinar, Sarah Kurian, XII C and Paridhi Prabhakar, XI B, with genuine smiles. According to her, sometimes reality is too complex and exhausting and at that time, it is stories which provide a way to escape and imagine a world that is soothing, where a person can swim in the deepest oceans or soar high above the clouds, irrespective of age. This webinar was truly a guide to Storytelling for adolescents.

f LIVE

Time: 12 pm
Day & Date: Saturday, 29.05.2021

Ms. Tanya talked about CATFIT, an organization designed to help and spread awareness to the youth, as well as adults. She explained brilliantly as to why a being must start taking his mental health into consideration, especially during the current pandemic and self-isolation. She agreed that although there are many options to vent out, still many tend not to do anything about it especially, adults and teenagers are the ones who fall in this category. Most do not reach out as they may feel ashamed, embarrassed, or weak being themselves the backbone of their families. In this webinar, she discussed the options, a person has and why it's important to seek help for self care. It was truly an enriching session.

By -Eva Sangwan
XI-A

Nowadays, with the pandemic and isolation, when mental health is even more at stake, the Guest Speaker, Ms. Tanya Chadha, Key Motivational Speaker, Social Activist and Certified NLP Practitioner gave an easy solution, that is, a person should talk about one's feelings with those who are trustworthy, as it's not healthy to bottle them up. She mentioned that maintaining a healthy diet, and regular sleep schedule is an absolute must.

7-Days Online Yoga Workshop

The International Day of Yoga is celebrated as an occasion to celebrate the spirit of life and its connect with soul, exponentially increasing the joy of living this gifted life. It is a proud day for India, as the creator of this beautiful form of art; which, if properly practiced, can keep India united for ages in spite of its diverse traditions.

Yoga is the study of balance, and balance is the aim of all living creatures. With numerous examples of the spirit of India, Yoga comes forward as one of the oldest. It is an art that connects skill and technique, life and soul, body and mind, nature and goal.

At this time, when the qualities of Yoga are needed the most, students of Grades IX and X conducted a seven days online workshop on Yoga, beginning from 15th of June to 21st of June 2021 LIVE on Facebook, culminating a spirit of positivity. The webinar featured Ms. Malkeet Kaur and Ms. Sanghamitra Roy as the guest speakers; both of whom are professional Yoga trainers and wish to spread passion for Yoga among students. The first episode titled "Discover Yoga to Rediscover Yourself" included both the guest speakers, and Senior Coordinator Ma'am, Dr. Rajni Hoda, who declared the Seven days workshop open.

7-Days Online Yoga Workshop

The second episode, headed by Ms. Sanghamitra Roy was titled "Yoga: Transformation of Body and Mind" and was centred on how Yoga is a method which leads to transformation of our entire body and can help in synchronizing it with mind.

The third episode, headed by Ms. Malkeet Kaur was titled "Yoga: Providing the Much Needed Calm". It threw light on the importance of Yoga and how it can keep our mind relaxed even in the adverse circumstances.

In the fourth episode, "Yoga: Harmonizing your Inner Self and Body", Ms. Sanghamitra Roy enlightened us how

the body needs to maintain an internal communication to function properly. A few postures were demonstrated by her and were performed by the students.

In the fifth episode Ms. Malkeet Kaur talked about how we can enhance the quality of life by natural means and how Yoga has become a medicine in these

tough times. The theme of the webinar was, "Yoga: A method for Recharging the Soul".

"Yoga: Get Stretched and be Unstressed", was the sixth episode, where Ms. Sanghamitra Roy centred her conversation on how stress and prolonged screen time can be tackled by all age groups through the means of Yoga.

The seventh episode, "Yoga: Stretch, Relax and Replenish", was the closing ceremony of this seven days online workshop and proved to be a grand success on the International Day of Yoga. Senior Coordinator Ma'am, Dr. Rajni Hoda, thanked both the guests, Ms. Sanghamitra Roy and Ms. Malkeet Kaur for the enriching sessions.

Today's Xaverians Tomorrow's Doctors

"A doctor is one who gives hope, even when one is in the shackles of death!"

It is rightly said by Thomas Edison "The doctor of the future will give no medicine but will interest his patients in the care of the human frame, in diet and in the cause and prevention of disease."

To be a doctor, means to live one's life to the service of others, for their happiness, for the sake of humanity. The art of medicine requires dedication and passion like no other, it takes many years of hard work to see a smile of relief on a patient's face.

In today's time when the world is battling against diseases like Covid-19, doctors and all the medical workers have become heroes without capes, warriors fighting in the front line.

Those students at St. Xavier's High School who are preparing themselves for taking the similar duties, were the panelists in the Webinar "TODAY'S XAVERIANS TOMORROW'S DOCTORS" on Doctor's Day (which is

on the first day of July) along with the panelists Miss Neha Sharma and Miss Honey Sharma. They gave an insight into what being a medical student is all about. They answered several questions which one might have in mind about doctors, such as, what keeps them going and why they chose medicine as a profession. It was truly an enlightening session.

International Plastic Bag Free Day

Everytime someone walks into a grocery store, they use a plastic bag and usually don't give a second thought.

That discarded plastic bag pollutes the environment for the next few decades. They are thrown into landfills and water bodies which leads to the death of aquatic life and disrupt the eco system.

To bring about a change in our generation, healthy practices are being instilled from the root level. St Xavier's High School organised a Week Long Campaign from 28th June to 3rd July on the occasion of International Plastic Bag Free Day. The students of grade IX and X converted their old T-Shirts into sustainable and durable bags. These may seem like small steps but these are the ones that make the biggest difference.

When Facilitators Gather

The transition from Middle to Senior Wing is quite a big one. It involves an increase in syllabus, classes and courses.

Students are expected to be more responsible as their internal marks and projects play an important role in their final result.

With the Pandemic and consequently online classes going on, it's easy to get overstressed. Hence, to solve all the queries of students and their parents before Pre Mid Term Exams, a virtual meet was organized with all subject teachers of grade IX.

INTERLUDE-1

Us and Only Us.

The last one and half years have been one of the most difficult months for mankind. This misery is been compared to a dreadful World War II. That sentence is enough for us to understand how bad the situation has been.

From March 2020 till today, nothing has been the same. We have been roaming around as masked bandits, whose crime is trying to enjoy life. It won't be right to say that we are not enjoying our time. Our family has been our backbone in this time, earlier sharing a meal together was only possible in the night but the privilege of sharing three out of three meals has become a possibility now.

The pandemic took a toll on our mental and physical health. We have been restricted from meeting our loved ones and many have even lost their loved ones. Every family has gone through difficult times, many struggled due to COVID and many due to similar and related disturbing reasons.

This situation has left us in doubt. What will happen next, is the main worry now. The struggle for positivity is not difficult but these testing times have made it difficult.

To make life easy, it's important to find happiness and positivity in the smallest things; every vegetable we cut, every dish we make, every book we read and every drawing we make, all of this is just a glimpse of what all we can do sitting in our homes. The fast running world has come to silent halt, and it is us, who have still managed to turn the adversity into an opportunity.

When someone asks me what I miss the most, I have one obvious answer: It is my friends, whom I miss, I miss that angry stare, when I used to irritate them, I miss that fights between us and I miss the good times between us.

Last one year I have lost, I will make up for it in no time. We, as citizens of this blessed planet might have gone through the worst of the worst times, but it is only us who have even fought back with power and determination.

This reminds me of the quote by Helen Keller-

"When one door of happiness closes, another opens; but often we look so long at the closed door that we do not see the one which has been opened for us!"

**By - Vedh Iyer
IX-C**

IMPACT OF COVID -19 ON ME

Presently, I am in Grade IX. I have lived through my entire Grade VIII Online. I want to share my experience during the current Covid-19 pandemic - about the advantages and disadvantages of how it affected my life.

When the pandemic started, the whole world went into a lockdown - which essentially meant no going to the school physically. I thought it would be great fun - as I could enjoy, play games, watch movies the whole day. All schools announced that the classes will be taken online now. Taking online classes has its own advantages and disadvantages.

After a month of doing online classes, I started to realize that online classes probably isn't the best thing!

Waking up early in the morning and immediately sitting in front of the screen for six hours - was totally new way of learning. As there was a lockdown announced, we couldn't even go out to buy our books, that meant we had to read through the soft copies of our text books.

It started to affect us mentally.

There were some advantages of this situation, like, we got more time to spend with our family, to build new interests.

We could learn new stuff through internet and other resources. As everything was happening online, we happen to learn more and more about technology, and how the computer works. We got more time for self-study.

But at the same time, it had its own disadvantages, that we could not go out to travel like we used to. Online classes and too much screen-time started to affect our eyes. After 6-7 hours of non-stop screen time, our eyes started paining and we experienced headaches. Normally, we used to go out and play but due to the lockdown, we couldn't even go out which had an impact on our health. Covid-19 not only affected us mentally but it also started to affect us physically. We couldn't meet our friends and extended family. Everything had to be done online.

Let's hope that Covid-19 ends soon and we get back to our normal life and start going to our school soon.

Take Care and Stay Safe !!

Cold War Rivalries and Future with a Unipolar World

Is Cold War II real?

The Cold War II is a term used to describe the increased post-Cold War era political and military tensions between the United States and China. It is also used to describe such tensions between the US and Russia, a state of the former Soviet Union, which disintegrated in 1991. Some have used the term as a comparison to the original Cold War.

The cold war was a series of confrontations between the US and USSR along with their respective allies after the second world war. It wasn't a full-fledged war but was pursued through political and economic actions. It was also an ideological conflict. USA advocating for capitalism while USSR for socialism. It was followed by many historic events. It also led to an arms race but which was further contained by various treaties.

For the past few decades, Chinese scholars, pundits, and diplomats have often accused the United States of adopting a "cold war mentality" towards China. They usually level these accusations when the USA enhances its military's position in Asia or strengthens the military capabilities of its allies and partners in East Asia. A recent example being how South Korea is building Longer-range missiles with the help of the USA.

Multilateralism is in serious disarray, as the former UN Secretary-General Ban Ki-Moon has observed. "We are moving in a very dangerous direction," Mr. Antonio Guterres said, "Our world cannot afford a future where the two largest economies split the globe in a Great Fracture - each with its trade and financial rules and internet and artificial intelligence capacities.

A technological and economic divide risks inevitably turning into a geostrategic and military divide. We must avoid this at all costs." It is indicated how he is warning of another cold war.

But, at the same time, It is also true that the United States and its closest allies have tried to limit the transfer of certain military technologies to China.

It is also inescapable today that current global crises like the coronavirus pandemic and environmental disasters oblige the US and China to confront the same problems, face the same threats and seize the same opportunities.

So, we can conclude that the conflicts possess a threat for Cold War II but if tackled through multiple negotiations and increased global cooperation, it can be evitable.
