

INTERNATIONAL DAY FOR BIODIVERSITY

DATE: 22 May, 2024

CONDUCTED BY: Department of science

STUDENTS INVOLVED: Students of Class VII to XII

“Biodiversity is the greatest treasure we have... It’s diminishment is to be prevented at all costs.”- Thomas Eisner

As humanity is facing the intertwined triple planetary crisis of climate change, biodiversity loss, and pollution, collaborative action is needed from all sides of society to restore harmony with nature and foster a transition to sustainable socio-economic systems. Be part of the Plan”, the theme of International day of Biological Diversity, May 22,2024, is a call to action for all stakeholders to halt and reverse the loss of biodiversity and raise awareness about the unprecedented environmental crisis that the world is

facing and how to protect the biodiversity on earth. In celebration of Biodiversity Day, students from ITL Public School explored the rich biodiversity of the Asola Bhati Wildlife Sanctuary in New Delhi. Home to 193 bird species, butterflies, and various mammals such as leopards and blackbucks, the sanctuary provided a glimpse into ancient ecosystems. The students marveled at the butterfly garden, observed ancient coves, and admired the pristine waters of Neeli Jheel, fostering a deeper connection to nature.

Let's come together to protect our planet's biodiversity, promote sustainable agriculture, and take steps towards mitigating climate change for a brighter future.
