

## **WORKSHOP BY DISCOVERY SCIENCE**

### **ADDA PROGRAM**

**A workshop for classes IV to IX students was conducted by Discovery science kids Adda program. It was a pre free show for a program that can be taken up by school to develop critical thinking and scientific aptitude in children. It brings various activities on various themes to correlate theoretical knowledge with real life. This makes knowledge not only practical but also meaningful.**

**The workshop started with an introduction followed by interesting activities of sound and light which made children as well students curious and enthusiastic. The various phenomena based on reflection, refraction, cloud formation, colored shadows were shown. It was a meaningful and interesting workshop with active participation of students.**
