

Robotics Workshop

Science place in collaboration with Intel Education organized a full day hands on robotics workshop on 24th April, 2015 (Friday) in APS Shankar Vihar Delhi Cantt. They selected 30 best students from all over Delhi schools to represent their school in it. J M International was also one of the lucky schools to get this opportunity.

Key features of the workshop were

- * Working on latest state of the art technology "Intel Galileo" and Adrino Board
- * Working with best young brains in Delhi
- * Learning Robotics programming
- * Learning various types of sensors and their uses

The workshop was a good experience for us to learn the basics of Robotics and detailed knowledge of "Intel Galileo" and Adrino Board. How the group of sensors, LED and motors can create useful functioning's etc. At the end there was a questionnaire round between the experts and the students. JMians had shown their active participation by asking and responding. Overall it was a memorable and a fruitful workshop for students and teachers as well.
