

22nd July 2013

Chemistry Made Easy

Venue: JMIS

*A work shop by Dr A.K Vashishth, pioneer in the field of chemistry was held for classes 11th and 12th. It was an interactive, informative and activity oriented session. It included the explanations of very basic chemical reactions and their applications. Students participated actively. Animations were used to explain formation of new bonds and breaking of old ones during the chemical reaction. All in all, the experience was most joyous but educational and each of the student left the room acquiring more knowledge in the branch of chemistry.*
