

Report on Handwriting Workshop

Date : 25th & 26th August

Venue: Auditorium

Handwriting is one of the most demanding movement skills which a child is expected to master. It is a complex skill involving a range of cognitive, linguistic, perceptual and motor abilities. A flexible, fluent and legible handwriting style empowers children to write with confidence and creativity. Keeping on this in mind International School organized two days Handwriting Workshop for students of classes IV & V by Mr. Mohan Roy, a handwriting Analyst and Grapho-Therapist.

To begin his workshop Mr. Ray said that "handwriting is as unique as your fingerprint but much more than that. Handwriting of a person reveals his personality, strengths, weaknesses, hidden

talents, fears, the way he thinks, the way he acts and reacts almost all the physical, psychological and philosophical aspects of your present life".

The workshop helped the students to keep pace and improve handwriting.

The students improved their handwriting in a play way method, without putting in much effort. Mohan Ray's healthy handwriting was unique as it was a quick method

to develop result in two days.

The workshop worked with a single goal, to make handwriting process easier and faster for the students.
