

29th May 2013

Workshop on Scientific approach of Teaching

Venue: JMIS

The workshop by Mr. Srivastav, Resource person, Biology was all about child centred approach of school. A brief discussion was done about what all the qualities a child has and how a teacher is supposed to bring out the best in the child and prepare him for life with an ability to deal with success and failure alike. It helped the teachers to gain insight into a lot of matters and facts that were never known to them before.
