Dear Parent,

We have recently observed a few cases of eye flu among our students, and it is crucial that we take immediate preventive measures to ensure the well-being of all our students and staff. Eye flu, also known as conjunctivitis, is a highly contagious condition that spreads easily through direct or indirect contact with infected individuals.

To contain the spread of this infection, I kindly request that you do not send your ward to school if he/she is suffering from eye flu symptoms. It is essential to prioritize your child's health, as well as the health of their peers and teachers. By keeping your child at home until they have fully recovered, we can significantly reduce the risk of further contagion within our school community.

Please be vigilant and observe the following guidelines:

1. If your child is experiencing symptoms such as redness, itchiness, excessive tearing, eye discharge, or sensitivity to light, please consult a healthcare professional for proper diagnosis and treatment.
2. While at home, ensure that your child practices good hygiene, such as regularly washing their hands with soap and water, avoiding touching their eyes unnecessarily, and using separate towels and pillows to prevent the spread of infection.
3. Encourage your child to refrain from sharing personal items, such as eye drops, contact lenses, eye makeup, or towels, to minimize the risk of transmission.
4. Once your child's symptoms have completely subsided, you can send your ward to school. This will help us ensure a safe and healthy environment for all students and staff members.

We understand the importance of regular attendance and education; however, the health and well-being of our students takes precedence. We appreciate your cooperation in this matter, as it enables us to maintain a safe and healthy educational environment for all.

If you have any questions or concerns, please feel free to contact our school nurse or the administration office. Together, we can effectively mitigate the spread of eye flu and safeguard the health of our school community.

Thank you for your understanding and cooperation.

Warm regards,
Principal
