

Visit to National Museum

Date: 27-11-2015

Venue: National Museum, New Delhi

National museum is an interactive space for enabling our young minds to think critically about the earliest civilisations, their growth and administration. The images of sculptures exclusive to the particular civilizations were shown to the learners. The Guide provided the detailed explanation about the significance of those sculptures. The discussion was directed towards orienting the learners to understand the Indian miniatures. Students were encouraged to observe the minute details of the sculptures.

In a nutshell, the visit was fruitful as the students of class 7 were able to apply the theory into practice.
