

## THE TRIP TO NATIONAL MUSEUM OF NATURAL HISTORY

**Students of class X went for an educational excursion on 19<sup>th</sup> of November at national museum of natural history. Students were enthusiastic and collected lots of information on evolution of life, various vegetations, fossils of some escaped species and various cultures and their effect on environment.**

**Students were also shown a documentary film on scarcity of water and how they can spread awareness about the same in their own surroundings. After visiting the museum students sat together and had their lunch.**

**I extend my warmth regard to school management for organizing such educational trip where students get such exposure.**
