**Circular (III-XII) : 2021-22**  
**Wi-Fi Month**

*Sustainable development is the pathway to the future we want for all. It offers a framework to generate economic growth, achieve social justice, exercise environmental stewardship and strengthen governance.*

— Ban Ki-moon

(Former Secretary-General of the United Nations)

In today's fast paced life, everyone wants everything on their fingertips. One of the comforts provided by computers to us today is websites. Technological innovations affect all aspects of our lives and the children of today are the leaders of tomorrow. So, it is imperative to best prepare them to be informed, conscientious leaders in a technologically advanced society. Keeping this in perspective, Queen's Valley School celebrates technological advancement in I.T and invites all the students in classes III to XII to participate in related Inter Class Competitions in the month of January, 2021.

We hope that our students imbibe the problem solving, designing, analytical and creative thinking skills. The events spread across the month will be based on Sustainable Development Goals (SDGs), otherwise known as the Global Goals. These goals are conceptualised as a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity.

The details of the Preliminary Rounds to be conducted for the competitions organised in the Wi-Fi Month are given below. A circular mentioning the names of the selected students and details regarding the Final Round will be uploaded on the school website.
