

Centre Level Science Seminar 2024

“Winners make a habit of manufacturing their own positive expectations in advance of the event.”

The Centre-Level Science Seminar was held on September 4, 2024, at Govt S Co-ed SSS, Sec 5, R.K. Puram. This competition attracted participants from over 20 schools in Zones 19 to 25 and 29, focusing on the theme: "Artificial Intelligence: Potentials and Concerns."

The event posed a significant challenge, comprising three rigorous rounds:

- Written Test
- Presentation
- Question-and-Answer Session with Judges

Vitasta Pathak from Class X-D distinguished herself in each round, securing the **second position** in the competition, with her presentation earning high praise from the judges. Her outstanding performance has secured her a place in the upcoming State-Level competition.

Congratulations to Vitasta Pathak on this remarkable achievement!
