

Workshop on Autism Friendly Education

1.	Title of the activity	Workshop on Autism Friendly Education
2.	Date of the activity	20 April 2024
3.	Organized by	ITL Public School
4.	Classes	Teachers (Candyfloss and Primary wing)
5.	Description of the activity	<p>"Autism doesn't need to be fixed, but the barriers in our society do. Inclusive education is the key to unlock every child's potential"</p> <p>As a part of World Autism Month, the India Academy of Pediatrics, in collaboration with ITL Public School, organized an enriching session on Autism-Friendly Education on 20 April'24. The session aimed to empower teachers with the knowledge to identify children with autism spectrum disorders (ASD) and design strategies for fostering an inclusive learning environment. It was our proud privilege that Doctors from Indian Academy of Pediatrics (West Delhi Branch) graced the session with their expertise on various aspects of autism, including understanding the disorder, the pivotal role played by teachers in the identification, early intervention, planning effective classroom strategies, enhancing communication and social skills, promoting positive behaviour, and fostering collaboration with parents and paraprofessionals. Every child has the right to education. Therefore, equipping teachers with specialized tools and support will ensure that the students with autism would receive the tailored education that they deserve, enabling them to thrive socially and academically.</p> <p>Together, we can build a more inclusive and equitable future for all learners.</p> <p>#WorldAutismMonth# #AutismAwareness# #Inclusive# #Equitablefuture#</p>
