

## **Latest techniques and Teaching Methods for Mathematics**

Date : 23 August 2014  
Venue : G.D Goenka , Sector 10, Dwarka  
Conducted by : Ms. Aarti Srivastav  
Organized by : Rachna Publications  
Attended by : Ms. Renu Joshi

The workshop was a great experience as Ms Aarti emphasized on group work and use of origami sheets in teaching Geometry. Many activities were conducted such as how to get the desired pattern using scissors only once. She also emphasized on doing activities based on logical thinking. Another activity of knowing our body parts was also conducted which can actually help in appreciating use of units in real life. One more activity of estimation and assessment was done which helps us to assume things and assess a child. The workshop was a great platform to learn many new and innovative things.
