

MALENTIME

Measurement workshop

CLASSES 6 AND 8

The workshop aimed at building estimation skills in the students so as to enable them to make estimations in daily life.

For example, when they are buying 1 kg of an item, they should be able to judge the weight by merely holding the packet.

Activities Undertaken

Class 6

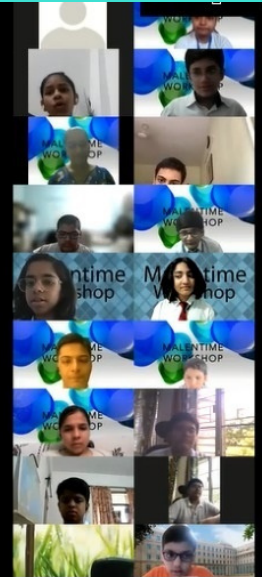

- Estimation of Volume of given containers
- Estimation of Weight of given objects
- Estimation of time given task without watching clock

Class 8

- Measurement of Blood Pressure
- BMI calculation
- Calculation of full height at the age of 18

Lets Find Out someone's BMI

- Height= 173
- Height in meters= 1.73
- Height in meter square= 2.99
- Weight in Kgs= 55
- $BMI = \frac{55}{2.99}$
- $BMI = 18.4$
