

Report on Science Debate Competition

Topic: Climate Change Caused by Global Warming has Become Irreversible

The Directorate of Education organized a Zonal Level Science Debate on 5 November 2024 at SKV Rajokri. Our school was ably represented by a team comprising Avni Sondhi of Class XI-E and Avantika of Class X-D. Avni Sondhi spoke against the motion, presenting a series of insightful arguments that reflected her analytical abilities and comprehensive understanding of the topic. Avantika, on the other hand, spoke in favour of the motion, delivering a well-structured and compelling presentation that captivated the audience and judges alike.

The debate served as an excellent platform for students to showcase their knowledge, critical thinking, and public speaking skills, while also fostering a spirit of scientific inquiry and intellectual engagement.

We are proud to announce that Avantika of Class X-D secured the **1st position** in the competition. Her articulate arguments, clarity of thought, and in-depth grasp of scientific concepts were highly appreciated by the judges.

We extend our heartfelt congratulations to both Avni and Avantika for their exemplary performances. Their participation and success in this prestigious event bring immense pride to our school and serve as an inspiration for their peers to strive for excellence in science and related disciplines.
