

EMPOWER YOUR STUDENTS WITH A CUTTING-EDGE SPACE, SCIENCE & TECH RESEARCH INTERNSHIP

This winter, give your students the chance to immerse themselves in **research, innovation, and advanced technology** with our **Futuristic Frontiers Winter Internship program!**

The **'Scientific Enquiry' Research Internship** is open to **high school students (Grades 9–12)** who aspire to go beyond textbooks and **gain real-world experience in science, technology, and space exploration.**

PROGRAM HIGHLIGHTS:

- **30+ Hours of Hands-On Experience:** Build prototypes and work with advanced tools.
- **Research & Innovation:** Explore real-world projects that go beyond space science.
- **Interaction with Experts:** Learn directly from scientists, engineers and other industry experts.
- **Globally Recognized Certifications:** IEEE-standard project reports and optional KHDA certification.
- **Career-Boosting Skills:** Develop technical writing, critical thinking, and project management skills.
