• Important Life Skills Every Student Should Know :

1. Developing & Pursuing Vision for Life

As a student, you might have observed your friends planning ahead with a clear purpose, while you are still figuring out your path. To develop a similar approach, it is essential to create your own vision. Begin by asking yourself meaningful questions about your aspirations and future plans, and start maintaining a journal. If you have a vision, it is advisable to work on it gradually and consistently. Stay committed to your goals, take practical steps, and engage in meaningful activities that bring you closer to achieving your vision.
