29	30 Father's Day (C)					

3. Learn Time Management & Organization

As the saying goes, either you run the day, or the day runs you! Setting goals, dividing them down into smaller ones, and prioritising work all improve productivity levels. Therefore, time management and organisational skills are qualities that drive success. Students must manage their time for short-term and long-term goals, whether it is getting ready for school, finishing a school assignment, or meeting friends.
