Dear Children,

It is blazing hot in summer and we begin to look forward for our summer vacations when we can relax and spend quality time with our family, friends and excursions.

Try to develop new skills that will enhance your knowledge and will be lessons for a lifetime. It will be great if you keep some semblance of academics alive in the fun.

Guidelines for students:

1. Ensure timely submission of the given assignment after the school reopens. Remember, a well-presented holiday homework fetches your accolades.
2. Revise all the topics which have been taught by your subject teachers in the new session.
3. Books are companions of lifetime. Read good books, novels, short stories, travelogues etc. During your summer holidays.
4. Take up an activity at home that is joyful and excites you like sketching, painting, learning any musical instrument, gardening etc.

Guidelines for the parents:

1. Communication skills play a pivotal role in grooming the holistic personality of the children. Please converse with your children preferably in English to acquaint them with the language skills.
2. Please spend quality time with your children engaging them in activities based on enhancing their powers of observation, imagination and creativity.
3. Please sensitize your child about the rich culture and heritage by watching different informative channels, videos or reading books.

Stay Healthy

Wishing you all a very enjoyable and fun-packed Summer Holidays

A. Case based question

Forests are the lungs of our planet, providing oxygen and supporting biodiversity. They regulate climate, produce rainfall, and offer habitat for countless species. Let's preserve and protect our forests, our lifeline for a sustainable future.

Paper is made from trees. When we waste paper, more and more trees are cut to make new paper. This results in deforestation. Therefore, we should use both sides of the paper, recycle paper and only print what is necessary. By taking these small measures, we can help protect forests and wildlife that lives there. We should always remember that saving paper means saving trees, and saving trees means saving our planet.

Paper mills generally use wood from bamboo, eucalyptus and subabul trees. Subabul wood is most widely used in recent times. Besides large number of chemicals such as common salt caustic soda and so on are also used in different stages of paper making. Scrap paper is also recycled in paper mills.

Answer the following questions.

1. Discuss the benefits that we get from Forest.
2. Why is it important to use paper wisely?
3. What happens when paper gets wasted?
4. What are the different ways through which we can save paper?
