

NATIONAL SCIENCE DAY-2025

DATE: 28 February 2025

VENUE: ITL PUBLIC SCHOOL, SEC 9, DWARKA.

"Innovation is the calling card of the young generation, for they are the architects of tomorrow's breakthroughs."

ITL Public School commemorates National Science Day on 28th February with the theme of Empowering Indian Youth for Global Leadership in Science and Innovation for Viksit Bharat.

Empowering Indian youth in science and innovation is a crucial step towards building a prosperous and sustainable future.

It will motivate our youth to become leaders in science and innovation which will lead to the creation of new industries, jobs, and economic opportunities.

In a globalized world, it's essential for India to remain competitive by nurturing young scientists and innovators and lead in global scientific research and technological development.

Young minds often bring fresh perspectives and creative solutions to problems and help address both local issues, such as healthcare and agriculture, and global challenges, like climate change and sustainability.

Investing in the scientific and innovative capabilities of the youth helps build a knowledge-based society that prioritizes education, research, and continuous learning to contribute for the betterment of the global community.
