

## Pottery Workshop for Grades IX–XII

A hands-on Pottery Workshop was organized for students of Grades IX to XII on 21<sup>st</sup> May 2025, offering them a refreshing creative experience beyond the classroom. The session aimed at enhancing students' artistic expression, fine motor skills, and appreciation for traditional crafts.

Led by professional ceramic artists, the workshop introduced students to the basics of clay modeling and wheel pottery. Each student had the opportunity to shape their own clay pieces, ranging from simple bowls to imaginative figures, under expert guidance. The activity not only fostered patience and focus but also encouraged mindfulness and stress relief. Many students expressed joy in working with clay for the first time and were enthusiastic about exploring the art form further.

Teachers observed a high level of engagement and creativity throughout the session. The beautifully crafted pieces were later displayed, celebrating each student's effort and originality. The session successfully blended skill building with enjoyment, highlighting the value of art in holistic education.
