

CBSE Capacity Building Workshop on Prospective Resource Person for Environmental Education and conservation of Natural Resources

Date: 27th June 2025

ITL Public School successfully conducted a Capacity Building Workshop under the CBSE Sankalp Sahodaya 'Mentoring the Mentor Programme' 3.0 on 27th June 2025, focusing on Environmental Education and the Conservation of Natural Resources. This STEM-aligned initiative brought together passionate educators and prospective CBSE Resource Persons (PRPs) to deepen their understanding of sustainability-oriented teaching practices.

The workshop was led by two esteemed CBSE resource persons—Mrs. Neetu Jhatta, Principal of Wishwood Cottage School, and Mr. Pankaj Munjal, educator and transformation coach - who shared powerful insights on weaving environmental consciousness into everyday classroom experiences.

Participants engaged in enriching discussions and hands-on eco-activities such as crafting bird feeders, designing coconut-shell planters, and assessing their personal carbon footprints. These activities provided a meaningful lens into the environmental impact of individual choices and classroom habits.

The workshop concluded with active reflections and a renewed collective commitment to fostering environmentally aware, responsible learners.

Together, we educate not just for today—but for a cleaner, greener, and more sustainable tomorrow.
