MENTORING THE MENTOR PROGRAMME- CYBER SAFETY AND SECURITY

Date: 23rd June 2025
Venue: ITL Public School

ITL Public School proudly hosted the CBSE Sankalp Sahodaya 'Mentoring the Mentor Programme' 3.0, with a focus on STEM-led education.

As part of this transformative initiative, a Capacity Building Workshop on "Cyber Safety and Security" was conducted on Monday, 23rd June 2025, exclusively for the teaching faculty.

The session was thoughtfully designed to empower educators with the knowledge, skills, and strategies needed to navigate the digital world safely and responsibly. It aimed to raise awareness about the multitude of online threats that exist today, while equipping participants with practical approaches to safeguard their personal information and maintain digital hygiene.

The workshop was led by two distinguished resource persons - Dr. Naveen Gupta, a renowned educator and thought leader in the field of Computer Science, and Ms. Poonam Kumar Mendiratta, Principal of The Manthan School, Greater Noida.

They guided the participants through various dimensions of cyber safety, including understanding threats such as phishing, malware, identity theft, cyberbullying, online scams, and plagiarism. The importance of managing privacy settings on social media, adopting best practices for creating strong passwords, and practicing appropriate online behaviour or netiquette in today's connected world was also emphasised.

The workshop concluded with a powerful takeaway for all attendees: Cyber safety is a shared responsibility - one that requires awareness, vigilance, and a commitment to responsible digital citizenship.
