

MATH BUZZ

ACTIVITY: Pattern Play

DATE: 17 July 2025

CONDUCTED BY: Class 2

Students of **Class 2** buzzed with excitement during the **Math Buzz Activity** as they created their very own **Pattern Necklaces**. Using **torn and crumpled waste paper**, the children decorated their necklaces while learning to recognize and replicate patterns in a fun and hands-on way.

The activity not only reinforced important math concepts like sequencing and pattern recognition but also encouraged **creativity and eco-friendly crafting**. It was a perfect blend of **mathematics and art**, turning learning into a colorful and joyful experience.

With smiles on their faces and patterns in their hands, our young learners truly proved that math can be both **meaningful and fun!**
