

AWARENESS ON DOLPHIN CONSERVATION

EVENT: Dolphin Conservation Awareness Activity

DATE: 21 July 2025

CONDUCTED BY: Primary Classes

Students from the Primary Classes participated in a joyful and meaningful activity to raise awareness about dolphin conservation. With eager hearts and creative minds, they explored the importance of protecting these intelligent and gentle marine creatures.

The session began with an informative audio-visual presentation that introduced students to the world of dolphins, their role in the marine ecosystem, and the threats they face. Inspired by what they learned, the children engaged in a series of creative activities to express their support for the cause.

They crafted beautiful drawings on the theme ‘**Save Dolphins**’, highlighting messages of love, care, and protection. As part of the campaign, students also designed colorful bookmarks with slogans and artwork promoting dolphin conservation and ocean awareness. These bookmarks served as little reminders of their pledge to protect marine life.

The activity was filled with enthusiasm, creativity, and compassion, helping students understand their role in preserving biodiversity and being responsible citizens of the planet. It was a fun, educational experience that connected art with advocacy.
