

KNOW YOUR SENSES

ACTIVITY: Hand on Activity on the topic ‘My Sense Organs’

DATE: 23 July 2025

CONDUCTED BY: Pre School

Our curious little learners from **Preschool** were all smiles as they took part in an engaging and hands-on activity on the topic “**My Sense Organs.**”

The children excitedly **matched and pasted each sense organ**—eyes, ears, nose, tongue, and skin—on a large **face cutout**, creating a fun and visual learning aid. This interactive approach helped them easily understand **how we see, hear, smell, taste, and feel** using our five sense organs.

The activity not only reinforced their **understanding of body awareness** but also supported **fine motor development, spatial recognition, and concept retention** through play-based learning.

It was a joyful, tactile experience that brought learning to life and made the concept of sense organs both **memorable and meaningful** for our little ones!
