<u>WEB WIZARDS</u>

ACTIVITY: Exploring Website Development with HTML
DATE: 23 JULY 2025
CONDUCTED BY: Class 10 Coding Club

Students of **Class X Coding Club** actively engaged in a hands-on session focused on **website development using HTML**. They explored how to create and structure web pages by writing their own **HTML code**, learning how to add headings, paragraphs, images, and more.

The session helped students understand the **building blocks of web design** while encouraging **logical thinking**, **creativity**, and **problem-solving**. They thoroughly enjoyed experimenting with code and watching their web pages take shape in real time.

This engaging activity provided a valuable glimpse into the world of **web development**, leaving students inspired and more confident in their growing digital skills.
