

MATHS IN 3D

ACTIVITY: Maths Buzz Week – Exploring 3D Geometry

DATE: 25 July 2025

CONDUCTED BY: Class 8C

Students of **Class 8C** had an exciting and hands-on learning experience during **Maths Buzz Week**, as they dove into the fascinating world of **3D geometric shapes**.

Using a variety of materials like **connectors, sticks, pipes, and origami**, the students enthusiastically constructed three-dimensional figures such as cubes, pyramids, and prisms. This engaging activity helped them **visualize complex mathematical concepts** and reinforced their understanding of shapes, edges, vertices, and faces through real-life application.

The collaborative effort turned the classroom into a creative math lab, sparking **curiosity, creativity, and teamwork**. It was a joyful and enriching experience that proved math can be **hands-on, interactive, and full of fun!**
