

HISTORY IN HANDS

ACTIVITY: Art Integration with History: CBE Activity

DATE: 1 August 2025

CONDUCTED BY: Class 6C

As part of the **Competency-Based Education (CBE)** approach, students of **Class 6C** engaged in a creative and educational activity that integrated **art with history**. Focusing on the chapter "**Beginning of Indian Civilization**", the students learned about the **Indus Valley Civilization** by **recreating clay toys** inspired by those used in ancient times.

This hands-on experience allowed students to connect with history in a meaningful way, as they discovered the importance of **craftsmanship, creativity, and urban planning** in one of the world's earliest civilizations. While shaping their clay creations, students also gained insight into the **daily lives and culture of the Indus Valley people**.

The activity not only made learning **interactive and fun**, but also deepened their understanding of historical concepts through the lens of art and imagination.
