## Students Excursion Trip

### Jim Corbett National Park

*Date of Trip: JULY 10 & 11 2025*

---

Our students recently visited the famous Jim Corbett National Park, a renowned wildlife sanctuary in India. The trip was organized to provide the students with first-hand experience of wildlife and nature conservation.

During the excursion, students observed various animals, including Bengal tigers, elephants, deer, and many species of birds. They were guided by forest experts who explained the ecosystem and the importance of protecting wildlife habitats.

The students also participated in activities such as nature walks, bird watching, and a safari ride that gave them an exciting glimpse into the jungle environment. Many students expressed their admiration for the natural beauty and the diverse flora and fauna.

This excursion helped students gain valuable knowledge about biodiversity, ecological balance, and conservation efforts, inspiring them to take environmental responsibility seriously. And visited Hanuman Dhaam in Ramnagar, Uttarakhand, as part of an educational trip. This spiritual and cultural site, dedicated to Lord Hanuman, offered students a peaceful environment to learn about Indian mythology, religious architecture, and values such as devotion and discipline. The visit also included guided tours of the Dhaam, where students learned about the life and teachings of Hanuman and the importance of Ramayana in Indian culture. The trip was both educational and inspiring, providing students with a deeper appreciation of their heritage and an opportunity to connect with nature and spirituality.
