

## LEARNING LETTERS, THE INTERACTIVE WAY

**ACTIVITY: Alphabet Matching on ActivInspire**

**DATE: 7 August 2025**

**CONDUCTED BY: Prep C**

**Children of Pre-Primary C** engaged in an exciting digital learning session using the interactive whiteboard tool – ActivInspire. With great enthusiasm, they participated in a matching activity where they used a stylus to connect pictures with their corresponding alphabets.

This hands-on activity not only reinforced letter recognition skills but also encouraged fine motor development and digital literacy. The interactive format captured their attention and made the learning process highly enjoyable. The joy on their faces as they correctly matched letters to pictures was a testament to the power of play-based learning in the digital age!
