

THE MAGIC OF TESSELLATIONS

ACTIVITY: Tessellation Art Activity

DATE: 13 August 2025

CONDUCTED BY: Class 7C

The students of Class 7C had an amazing time creating *Tessellation Art* near the stage area. This engaging activity allowed them to explore the fascinating world of patterns and symmetry. Students experimented with different shapes and discovered how they can fit together perfectly without leaving gaps or overlapping.

The activity not only enhanced their creativity but also deepened their understanding of mathematical concepts like geometry, symmetry, and spatial awareness. It was a wonderful blend of *fun and learning*, where art met mathematics in the most colorful way!
