

SEEDS OF CURIOSITY

ACTIVITY: Seed Germination Activity

DATE: 1 September 2025

CONDUCTED BY: Prep Classes

Children enthusiastically took part in a **hands-on science activity** where they placed soaked whole moong dal seeds in a wet cotton swab. With regular watering, they will carefully observe the changes in the seeds over the coming days. Through this engaging activity, students gained practical understanding of the **process of seed germination** and discovered the vital role of water and air in a plant's growth. The experience not only sparked their curiosity but also encouraged **exploration, observation, and scientific thinking** in a fun and interactive way.
