

TECHNOLOGY DAY AT BLOOM - DAY 1

EVENT: Technology Day at Bloom

DATE: 3 November 2025

CONDUCTED BY: Class 3

Technology Day was celebrated in Class 3 with great enthusiasm, highlighting the importance of digital learning and 21st-century skills. The event encouraged students to explore technology meaningfully and showcase their growing confidence with digital tools.

Students actively engaged in the session by using Chromebooks to solve practice sets and complete a video-based activity thoughtfully designed by their teachers. Their excitement and focus reflected how technology can make learning interactive, effective, and enjoyable.

A special highlight of the celebration was the involvement of parents, who were invited to observe and experience their children's learning journey. They were delighted to see how confidently the young learners navigated digital platforms, solved tasks, and collaborated with their peers.

The event not only strengthened students' digital competencies but also fostered a stronger connection between school and parents, making Technology Day a truly meaningful and memorable experience for everyone.
