

TECHNOLOGY DAY AT BLOOM - DAY 2

EVENT: Technology Day at Bloom

DATE: 4 November 2025

CONDUCTED BY: Class 4

Class 4 celebrated Technology Day with great enthusiasm, highlighting the importance of digital learning and the growing tech confidence of students. Throughout the event, students actively used Chromebooks to solve practice sets, watch interactive videos, and participate in live quizzes, making learning both fun and meaningful. They also created thoughtful thank-you slides for their parents using Google Slides, showcasing their creativity and digital skills.

A major highlight of the celebration was the parent participation segment. Parents were invited to observe their children as they confidently navigated digital tools to learn, collaborate, and problem-solve. They were especially excited to witness the use of **robots** and **Oculus**, which gave them a glimpse into how futuristic technology is being integrated into learning.

The celebration not only strengthened students' digital competencies but also deepened the bond between school and parents. Technology Day was truly an inspiring and enriching experience for everyone involved.
