

ASSIGNMENT NO. 6

SUBJECT: BIOLOGY CLASS-IX DECEMBER'2025

CHAPTER 12: Improvement In Food Resources

1. MULTIPLE CHOICE QUESTIONS:

- (i) The changes brought by biotic and abiotic factors in the food grains which are not stored properly includes:
 - (a) Degradation in quality and discoloration of produce
 - (b) Loss in weight
- (c) Poor germinability
- (d) All of these
- (ii) The way of incorporating desirable characters into crop varieties is by :
 - (a) Crop rotation
 - (b) Hybridization
 - (c) Intercropping
 - (d) Multiple cropping
- (iii) Which one of the following species of honeybee is an Italian species:
 - (a) Apis dorsata
 - (b) Apis florae
 - (c) Apis cerana indica
 - (d) Apis mallifera
- 2. This question consists of two statements-ASSERTION (A) and REASON(R), answer the question selecting the appropriate option given below
 - a) Both A and R are true and R is the correct explanation for A
 - b) Both A and R are true and R is not the correct explanation for A
 - c) A is true but R is false
 - d) A is false but R is true
 - ASSERTION(A): To increase production of fish, they can be cultured in marine and inland ecosystem.
 - REASON(R): Marine fish capture is done by fishing nets guided by echosounders and satellites.

 Compost fish culture system is commonly used for fish farming.

3. Answer the following questions:

- 1. "Excessive use of chemicals such as insecticides and pesticides causes a threat to Ecology."

 Explain with reason.
- 2. Mention the basis of crop selection in intercropping and crop rotation.
- 3. Mention three practices in which cattle farming is beneficial to mankind.
- 4. How does catla differ from mrigal?
- 5. Name the two vitamins which are added in the poultry feed.
- 6. On what factors does the growth of plants and flowering are dependent .
