ASSIGNMENT NO. 6

SUBJECT: SOCIAL SCIENCE   **CLASS-IX**   **Dec,2025**

GEOGRAPHY

Ch 4 Climate

Q1. During which months does Tamil Nadu receive most of its rainfall?
a) June to September
b) October to December
c) January to March
d) April to May

Q2. The western disturbances bring rainfall to which part of India?
a) Northern plains
b) Coastal Andhra Pradesh
c) Central India
d) Northeast

Q3. The coastal areas experience moderate temperatures while the interior of the country experiences extreme temperatures. Explain.

Q4. Assertion Reason:

a) Both A and R are true and R is the correct explanation of A.
b) Both A and R are true but R is not the correct explanation of A.
c) A is true but R is false.
d) A is false but R is true.

I **Assertion (A):** The coastal regions experience moderate climate.
Reason (R): Land and sea breezes help to maintain a uniform temperature between day and night.

II **Assertion (A):** The monsoon is known for its uncertainty.
Reason (R): The arrival and withdrawal of monsoon winds vary every year, and rainfall is unevenly distributed.

Q5. Why is the monsoon considered a unifying bond in India?

Q6. Read the source and answer the questions that follow:

India's climate influences its agriculture, food habits, clothing, and festivals. Areas with heavy rainfall grow rice, while drier regions prefer wheat and pulses. People wear cotton clothes in hot and humid regions, while woolens are used in cold areas.

i.   How does rainfall influence the cropping pattern in India?
ii. Give two examples of how climate affects our lifestyle.
iii. Name two festivals associated with harvest or monsoon.

Ch 6 Population

Q1. The most populous state of India (as per 2011 Census) is:
a) Maharashtra
b) Bihar
c) Uttar Pradesh
d) West Bengal

Q2. India's population growth has been rapid due to:
a) High birth rate
b) Low death rate
c) Both a and b
d) None of these

Q3. If death rate falls but birth rate remains high, the population will:
a) Decline
b) Grow rapidly
c) Become stable
d) Decrease slowly

Q4. **Assertion (A):** The working-age population in India is considered productive.

Reason (R): It includes the age group 0–14 years.

a) Both A and R are true and R is the correct explanation of A.
b) Both A and R are true but R is not the correct explanation of A.
c) A is true but R is false.
d) A is false but R is true.

Q5. Read the source and answer the questions that follow:

India has an uneven distribution of population. The northern plains have a dense population because they have fertile soil, flat land, and abundant water resources. In contrast, areas like Thar Desert, the Himalayas, and some plateau regions have sparse population due to harsh climate and difficult terrain.

i.   Why is population density high in the northern plains?
ii. Give one physical and one economic reason for sparse population in deserts.

Q6. Write in detail about migration with respect to a population growth.
