

IMPRESSIONS FROM NATURE

ACTIVITY: Block Printing

DATE: 17 December 2025

CONDUCTED BY: Class 6A

The **Block Printing** activity conducted by **Class 6A** was a vibrant and hands-on creative experience that blended art with sustainability. Students explored the traditional art of block printing by using everyday vegetables such as **potato, okra, onion, and capsicum** as natural printing blocks on cotton cloth.

Through this activity, learners experimented with different **shapes, textures, repetition, symmetry, and colour combinations**, discovering how each vegetable created a distinct and unique pattern. The process sparked imagination and curiosity, as students observed how simple natural materials could be transformed into effective artistic tools.

The activity not only enhanced students' artistic skills and creativity but also helped them appreciate **eco-friendly art practices**. It reinforced the idea that beautiful designs can be created using sustainable resources, making the learning experience both meaningful and enjoyable.
