- to improve classroom engagement through technology.
- to encourage innovative and interactive teaching practices
- to support blended and technology-enabled learning.

“Technology will never replace great teachers, but technology in the hands of great teachers can be transformational.” — George Couros

A professional development workshop on “Digital Tools in the Classroom” was conducted at MBS International on 7 January 2026. The workshop aimed to enhance teachers’ digital competencies and promote the effective integration of technology in teaching and learning.

The session highlighted the importance of digital tools in creating interactive, engaging, and student-centered classrooms. Various digital platforms for lesson planning, assessments, presentations, and collaborative learning were introduced through live demonstrations and practical examples.

The workshop was aligned with the National Education Policy (NEP) 2020, emphasizing technology-enabled pedagogy, experiential and competency-based learning, and the development of 21st-century skills. The role of digital tools in supporting Bloom's Taxonomy and promoting higher-order thinking skills was also discussed.

Teachers actively participated, shared their experiences, and explored ways to integrate technology into their respective subjects. The session emphasized the role of a good teacher as a facilitator and guide in the digital era.

Overall, the workshop was informative and effective, equipping teachers with practical skills and reinforcing innovative and quality education.
