

Excursion of Classes III-V

DATE: 10 February 2026

To enrich learning through real-world experiences, ITL Public School organised an engaging educational excursion for students of Classes III–V to the Waste to Wonders Park and the National Rail Museum.

At Waste to Wonders, students were fascinated by iconic world monuments crafted entirely from recycled waste. The visit delivered a powerful message on sustainability, inspiring young minds to think creatively about waste management, reuse, and environmental responsibility.

The journey continued at the National Rail Museum, where students explored India's rich railway heritage through vintage engines and interactive exhibits. Learning how railways connect the nation sparked curiosity, excitement, and a deeper appreciation for innovation and engineering.

Filled with joy, wonder, and meaningful learning, the excursion truly moved education beyond the classroom, nurturing awareness, creativity, and holistic development.

Glimpses of learning, fun, and exploration!
