First, you will need to be sure that your soil stays moist. You should water your seed right after you plant it, and water it each day. If it is very hot, you may even need to water it twice a day. Your plant will also need sunlight. If your plant is in a pot, place the plant in a spot where it will get plenty of sun. If you are planting seeds in a garden, make sure the garden is in a place where it will get sunlight throughout the day.</p> <div data-bbox="943 1073 1015 1142" data-label="Image"> </div>
